Mr. Fullarton

March

Today you are you! That is truer than true! There
is no one alive who is you-er than you!
-Dr. Seuss

This month our theme is Dr. Seuss!

We are very fortunate to have a student teacher for the next eight weeks. Miss Emmons is from B.C. but has been taking her degree here in Lacombe at Burman University.

As a class we will be reading Dr. Seuss books and doing literacy activities to accompany them. Students will continue to work on writing in complete sentences and adding detail to their writing. Students are doing "How To" writing which is a great opportunity to use transition words and write in detail.

In mathematics we will continue to work on double-digit addition and subtraction.

Our new unit in science is Hot and Cold. In this unit students will learn how to: measure temperature in degrees celsius, describe the role of insulation, and recognize that the human body temperature is relatively constant.
